

Delphi Service Centre Braking, Steering & Suspension

Today's modern vehicles rely more and more on complex electronics. The use of electronics in braking and steering systems is making an enormous contribution to road safety, by helping drivers to stop more quickly and retain control. For example, cars are starting to appear with brake pedals that are electrically-connected to the main brake cylinder in order to shorten stopping distances.

But as vehicles have become more sophisticated, so too has the technology needed to diagnose and service them. This all adds up to a unique service opportunity for garages with the right knowledge and equipment.

Our OE Intelligence

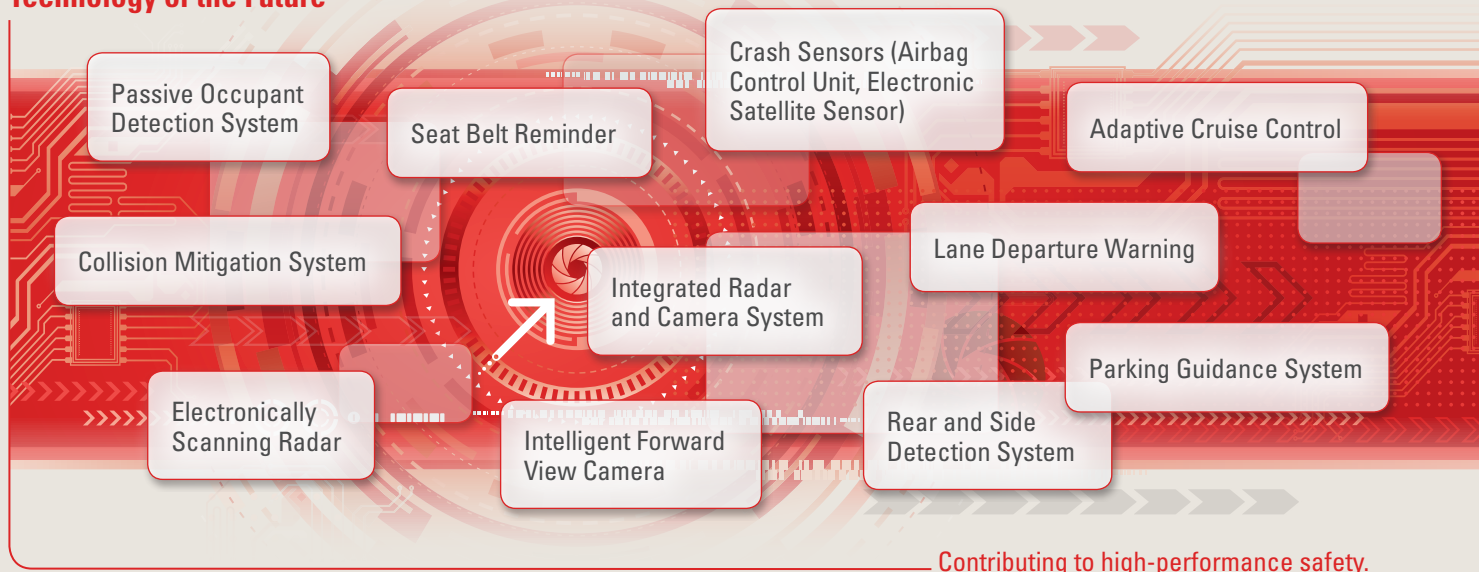

Our Original Equipment (OE) safety expertise extends from crash sensing electronics to collision mitigation. With our award-winning radar, vision and vehicle integration expertise, Delphi is enabling innovative active safety systems that help make high-performance safety a given.

This expertise allows us to offer a broad aftermarket solution of safety critical parts including:

- > Brake disks > Brake pads > Drums > Master cylinders
- > Fluids > Ball joints > Tie rods > Connectors > Wishbones
- > Track control arms > Link stabilisers
- > Other key system components

Are you ready? Delphi is!

Technology of the Future

Braking, Steering & Suspension Module

By joining our Delphi Service Centre Braking, Steering and Suspension programme, you will gain the technology, know-how and support needed to service and repair these safety critical components quickly, efficiently and profitably, including:

- OE-level training with courses such as:
 - > SRS systems
 - > ABS and stability control systems
 - > Engines and transmission
 - > Automatic transmission
- Delphi DS Tool with advanced vehicle diagnostics:
 - > Electric park brake (wind-back callipers for pad replacement/reset)
 - > Brake bleeding
 - > Coding of control units (post replacement)
- Specialist tooling including:
 - > Pressure bleed kit
 - > Brake fluid safety meter
 - > Brake servicing kit
 - > Hub cleaning kit
- Comprehensive technical support including access to our on-line information database and a technical hotline
- Access to our range of OE-quality parts including:
 - > Brake pads, discs, drums, shoes, fitting accessories, hoses, master and slave cylinders, wheels cylinders, brake fluid and ABS speed sensors
 - > Steering and suspension wishbones, track control arms, link stabilisers, upper/lower ball joints, rack gaiters, rubber to metal parts, engine mounts, inner/outer tie rods and tie rod ends.

The right tools to help you do the right repairs for your customers!
