

# Delphi Service Centre Engine Management

As Original Equipment (OE) technologies enter the automotive market at a pace unlike ever before, the electronic content on new vehicles is rising at a rapid rate. In the 1980's, 15% of a vehicle's value was electronics. Today that number is 40% and growing. For any vehicle, this means that a significant sum is tied into the vehicle electronics alone.

But what does this mean to you? It means a substantial repair opportunity. Garages need to be prepared to diagnose and service this advanced technology.

## **Our OE Intelligence**

Delphi is world-renowned as a leading OE manufacturer of engine management systems. Our OE expertise not only means we can provide integrated systems, it also enables us to develop components that are optimised to deliver the required performance. So whether it's a complete system or an individual component, our systems expertise is built into every product. This allows us to offer a broad OE and aftermarket solution including:

- > Exhaust Gas Recirculation (EGR) valves
- > Multec<sup>®</sup> gasoline port fuel injectors
- > Integrated air/fuel modules > Ignition coils
- > Oxygen sensors > Other key system components

With more than 16 product families within our vehicle electronics portfolio, Delphi is committed to the on-going development of our product range.

## **The Company that Makes the Parts Cars are Born With**

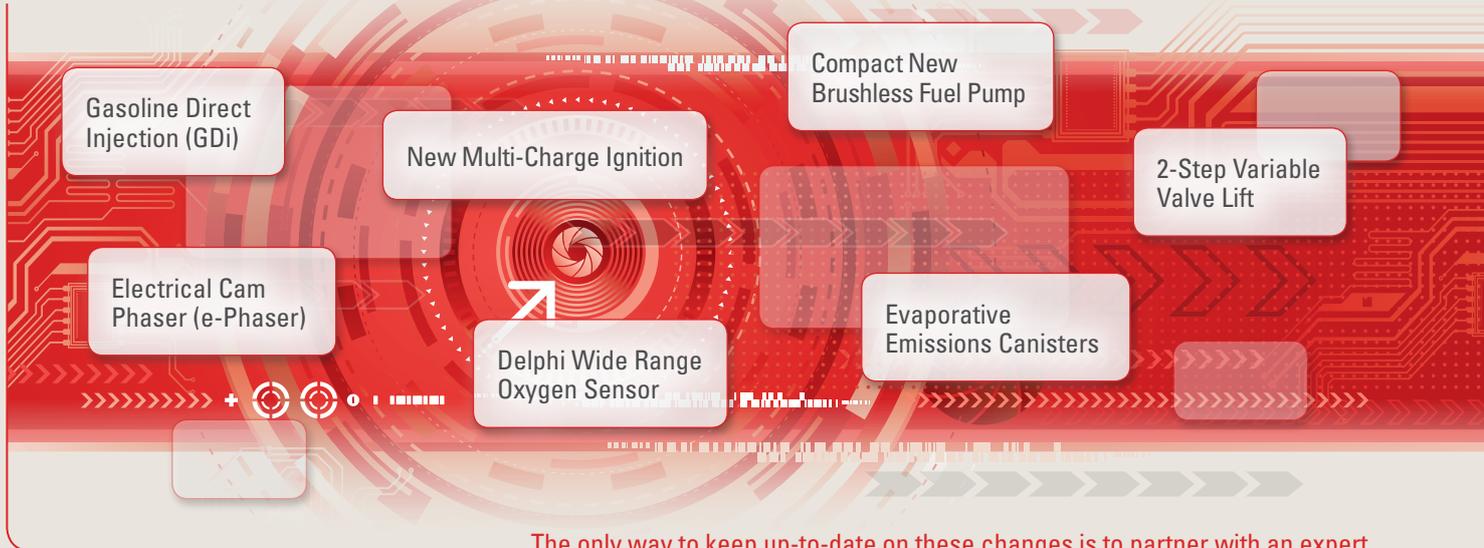

Vehicle manufacturers around the world know they can rely on Delphi's expertise in engine management technology:

BMW, Chrysler, Daimler, Ford Group, General Motors, Honda, Hyundai, PSA, Toyota, Volkswagen...

...all choose Delphi engine management technology.

**Are you ready? Delphi is!**

## Technology of the Future

The only way to keep up-to-date on these changes is to partner with an expert.

## Engine Management Module

By joining our Delphi Service Centre Engine Management programme, you will gain the technology, know-how and support needed to service and repair these systems quickly, efficiently and profitably, including:

- OE-level training with courses such as:
  - > Essential electrics
  - > Engine management
  - > Multiplex
  - > SRS
- Delphi DS tool offering advanced engine management diagnostics:
  - > Reset adaption (post renewal of throttle body, MAP, MAF etc.)
  - > Adjust/reset throttle actuator
  - > EGR valve coding

- Specialist equipment including:
  - > Fuel injection pressure tester
  - > O2 port chaser
- Comprehensive technical support including access to our on-line information database and a technical hotline
- Access to our growing range of OE and OE-quality engine management components including:
  - > ABS speed sensors, camshaft sensors, temperature sensors, crankshaft sensors, MAF sensors, MAP sensors, EGR valves, fuel pumps and modules, fuel injectors, ignition coils, knock sensors, oxygen sensors, throttle position sensors, and oil pressure switches

The right tools to help you do the right repairs for your customers!  
Join the Delphi Service Centre network today!

Interested?! You should be!  
Don't miss out on this exciting opportunity.
